If you follow the instructions correctly you will make money.

Before giving you any instructions to follow, we would like you to take a moment to read through the following information, so you can get a better picture of what we are trying to achieve for you!

Please remember, **you must follow these instructions to the letter** that is the whole point of this system – any deviation, no matter how small or trivial can spell disaster! Do not even attempt anything in this package unless you can click where we tell you and bet where we tell you – that is how this system works. Please ensure that you read ALL THE WAY THROUGH this text BEFORE attempting ANY betting. It will not take long as is very important!

All of the odds on a Roulette table are based on the “law of averages” minus one or two points. This way, the Casino can only gain money from you playing the table. Until Now. We have blown away the stupid “Law of Averages” and turned it to the players’ advantage.

Yes, surely the Casino will “Cotton on” eventually, but when is a different matter. If you think about it, how many people are there playing on on/line Casinos? You wouldn’t believe me if I told you!

We are talking millions of people. Compare that to the number of people using the following system and it’ll be something like one in 3 million! Every Casino has an “Acceptable Loss”, therefore giving us all plenty of time to win some serious money before they change the gaming rules!

## **The Basics**

Now lets get started.

Firstly, we have tried and tested numerous online Casinos, and come to the conclusion that there are only a select few that this system will work on. For this reason, we seriously recommend that you only play this system at the Casino below, or the one’s listed at the end of this document.

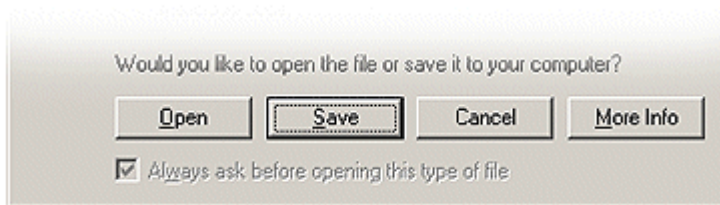

**CLICK ON THE BANNER BELOW TO START**

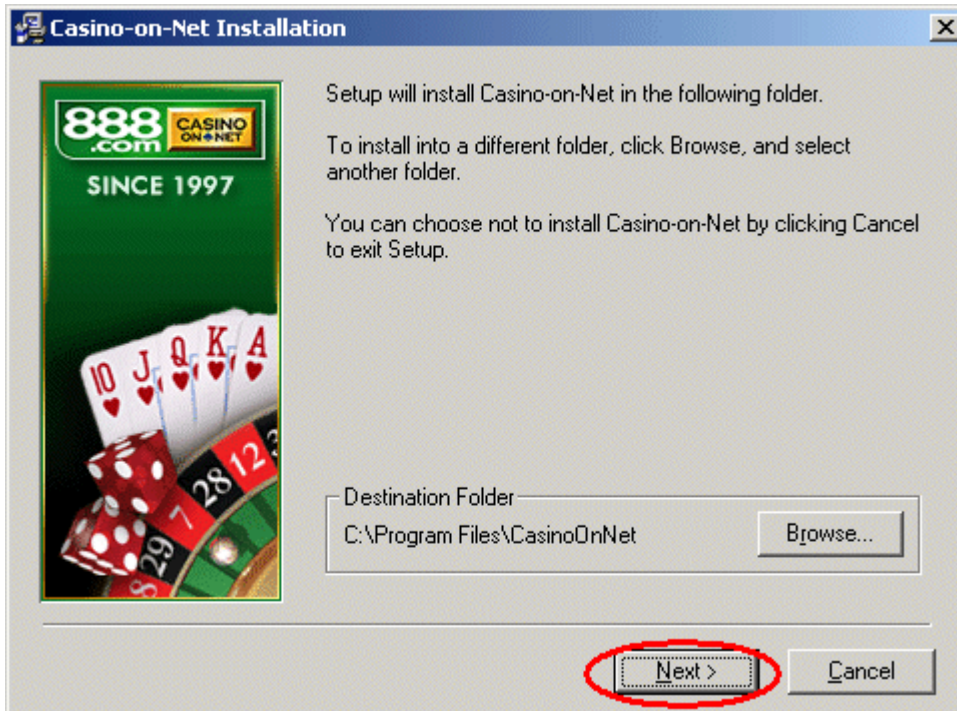

If you are a US Player, [click Here](#)

The banner features the 888.com logo and 'CASINO ON NET' text. A prominent offer states '100% BONUS UP TO \$200 ON YOUR FIRST DEPOSIT'. A 'DOWNLOAD CASINO' button is circled in red. Below it is a 'No Download Play' button. The 'New Video Slots' section includes 'TOP SPIN SNOOKER' and a grid of slot game icons. Other game icons include Blackjack, Roulette, Classic Slots, Video Poker, Craps, and Caribbean Poker. At the bottom, there are links for 'More Games' and 'Invite a Friend', a 'VIP' badge, and a 'JACKPOTS' section listing 'Millionaire genie \$1,119,926.74' and 'Trea:'. The entire banner has a green background.

Then click the 'Download Casino' graphic. Click 'Cancel' for any pop-up messages that occur.

A Dialog box will appear shortly. Click either "Open", "Run" or "Save" and follow the easy installation steps.

Click 'Next' to complete the installation.

When the installation completes, run the casino software: 

Select 'Money Play' to get started. You can select 'Practice Play' if you wish, but you won't get your Matching Bonus, and you won't make any money. If you want to build your confidence in this system, then you can choose 'Practice Play'. I recommend you choose practice play and wager \$6 on the five dollar tables so you can get a good feel of the potential this software can make you.

This is where you actually deposit your money. I highly recommend that you deposit \$200 because that is what the casino will match you on. You also need to start with this much for the betting to properly work. If you feel that \$200 is too much, then you should put at least \$100 in to start, but you are also reducing your odds of winning as this system only works with a \$200 wagering limit.

Once you have made your deposit, your Cashier amount will be \$400 (or double what you deposited). At this point, you can either withdraw your initial \$200, or you can leave it in your account.

I highly recommend that you leave that money in your account as the casino software has a tendency to be more favorable to accounts that keep their deposit. At this point you are set up and ready to start playing.

Once you are done adding money to the Cashier, you will be taken to the Casino Lobby. Click on the Roulette icon.

Select 'Private Table'.

Select 'Standard'.

Now that you're up and running, we suggest that you go to practice play and play the system as we explain so you fully understand it and can see how much money you are going to make. Only after you fully understand the system will you need to transfer money into your Casino account. We advise that to make the most of their introductory offers and transfer \$200 (GBP107) to the Casino account. If this seems too much, then we recommend that you transfer no less than \$100.

Now, this system is based on betting on the Low/Middle/High fields ONLY. You simply bet on the same one, with only a slight rise in stake each time, until it wins. I know that some of you will be thinking - *oh no, that sounds dangerous...* but please, read on...

These fields have a 1 in 3 chance of winning according to the "Law of Averages" and give a return of 2 to 1. By following our system, you only need 1 in 14 to be a winner! (Depending on your balance) This way, you have more than quadrupled the Law of Averages and given yourself an unbelievable advantage!

First of all, you will need to understand what these bets are:

- 1) This is a bet on **Low**. You win if any number from 1/12 (Inclusive) comes in.

- 2) This is a bet on **Middle**. You win if any number from 13/24 (Inclusive) comes in.

3) This is a bet on **High**. You win if any number from 25/36 (Inclusive) comes in.

# Let`s Make Money

If you follow our instructions, you will gain between \$1 and \$3 for every winning number, regardless of how many losing ones you have had.

Now, print the following table which you will use as a recording sheet: It is good to make some handy copies.

0	5	10	15	20	L	M	H	O
25	30	35	40	45				
50	55	60	65	70				
75	80	85	90	95				

The idea with this is to keep a precise record of exactly how the table you are betting on is 'Running'. There is no point to betting at random, so please, be accurate with this. What you need to do is every time you spin the wheel, record whether a 'Low,' (M) 'Middle'(M) or 'High' (H) number drops in.

For example, if you are on a table and spin the wheel ten times, and the following numbers drop in: 04, 11, 36, 14, 20, 25, 02, 33, 13, 16, your table would look like this:

0	5	10	15	20	L	M	H	O										
L	L	H	M	M	H	L	H	M	M									
25	30	35	40	45														
50	55	60	65	70														
75	80	85	90	95														

When you begin to play roulette, DO NOT place ANY bets at all.

Patience is the key now. Keep spinning the wheel and recording what numbers drop in on your table. What you are waiting for is a consecutive run where 1 of the sections of number has not come in for 5 spins.

A Low number (L) hasn't dropped in for five consecutive spins. It's time to start betting!

Bet Number	Stake	Gain
1	\$1	+\$2
2	\$2	+\$3
3	\$3	+\$2
4	\$4	+\$2
5	\$6	+\$2
6	\$9	+\$2
7	\$13	+\$1
8	\$20	+\$2
9	\$30	+\$2
10	\$45	+\$2
11	\$67	+\$1

Place bet number 1 on the Low section of the board (if unsure, check diagram above). Spin the wheel. If a low number drops in, Congratulations! You are now in profit! If not, do not worry. Place bet number 2 on Low. Again, if you win, well done, you are in profit! If not, do not worry, place bet number 3 on Low. Keep placing the bets until you win. By doing this, and sticking to the staking plan shown on the left, and you will never lose when your number drops in.

You must be precise though!

I know that the gains do not appear to be a lot per bet, but as it is possible to lay up to 70 bets in an hour, your money will soon add up. Think about it. I bet \$70 an hour is a better wage than you are earning at the minute, and all it takes is a bit of time and discipline!

I realize that a few of you may be confused by this, but don't worry, read through it again a few times and it will become clear.

That really is how simple this system is!

## **Practice before playing**

Then, create a demo play account – you will find that you have \$2000 practice money to put our system to the test!

## Make your first easy \$200 and play risk free !!!

So if you deposit \$200 to your new Casino account, you will receive \$400! There you go / \$200 up already and you haven't even started playing, or put any of your own money at risk! Now, start winning!

## Make even more money

Once you have mastered this system you can easily double your earnings by using this same system on a different set of variables marked in the image below which I usually label as ABC:

These variable also have a 2 is to 1 revenue system. Hence all you need to do is start marking the occurrences of A,B and C and once again start betting after the 5th time that a group of numbers has not been drawn. It is better to keep a separate sheet for ABC and LMH. However if you are not really focused and disciplined, do not try to combine these 2 systems, otherwise it could start losing money due to lack of concentration.

## **Important Notes:**

In order to continue using this system successfully we suggest that you follow the following basic guidelines:

1. Do not always play using the same casino. We have given you 3 casinos to choose from ([Click Here](#)). There are many more which give a startup bonus

Do not spend more than 20-30 minutes playing on the same roulette table.

After you win 3-5 times on a table change roulette table.

If you win \$75 in a particular casino change casino

If you win \$200 in a day call it quits, or at worst stop playing for 2-3 hours.

In the beginning play conservatively - i.e. start betting at the 6th roll

## **Automate the Whole System - Make More Money !**
